

ZJ Series (Aluminum Butterfly Valves)

■ PA66 / Polyamide 66 is

- One of the most versatile engineering thermoplastics.
- An outstanding candidate for metal replacement applications.
- High strength over wide temperature range.
- Stiffness and impact resistance is good.

■ Technical Specification

Maximum service pressure	1.0MPa
Service temperature range *	-10°C - 100°C
Face to Face	EN558 Basic series 20
Coupling Flanges	PN10 (JIS5K / 10K)

* Condition : Fluid is not frozen.

■ P-T Rating

Pressure(MPa)

* Please contact to us for technical advice when service conditions may exceed the P-T rating range limited here.

■ Applications : Water , Air , Light Chemical *

- HVAC
- Plumbing
- WTP (Water Treatment Process)
- ETP (Effluent Treatment Process)
- STP (Sewage Treatment Process)

* For detail : Please contact to us. (as below)

■ Material
